Journals at Ehesp

- Le catalogue des périodiques AtoZ :

More than 18 000 titles, from Ehesp's subscriptions ;
Be aware : AtoZ is not a bibliographic database. You have to perform your search for a journal's title, not for an article's title

What is it for ? You want to find a journal article from a reading list : first you search the periodical and know wether it is available or not from the library, lot of them online.

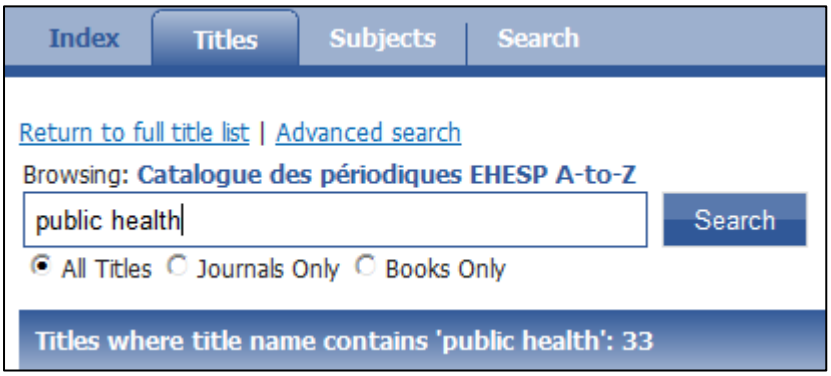
Embargo, what does it mean ?: the online access is restricted by the publisher during a period of xx months

How to use it :
- *Titles* allows you to search for a periodical, by the exact title name or only with some words
- You can check wether International journal of epidemiology is available from the library or not or which periodicals are dealing about **epidemiolog*** (* = truncation for epidemiology ou epidemiologie, epidemiologic…).
- *Subjects* allows you to search for a periodical by a drop-down menu ;
- Search is to be used if you want to perform your search with other criteria such as Issn, publisher ..

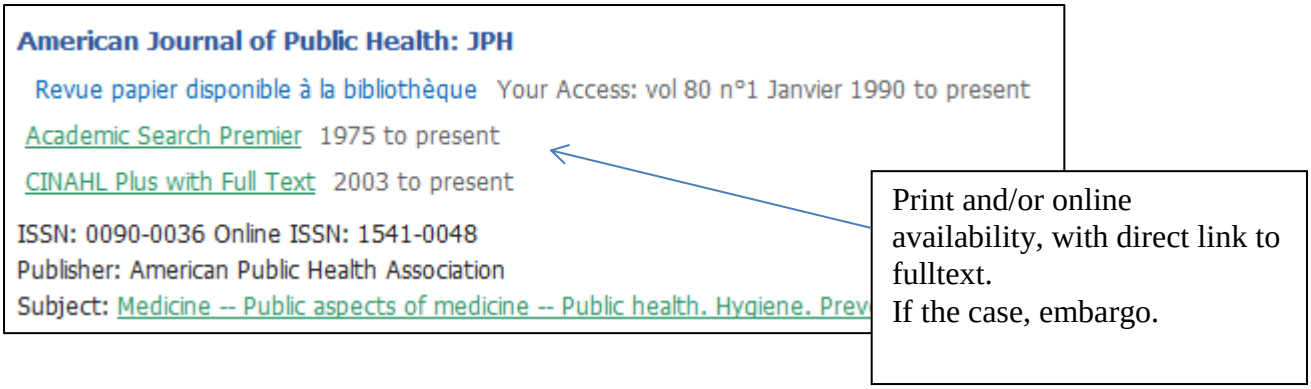
How to read a reference in AtoZ:

Exemple 1 :

Write the periodical's title or words you are looking for then "search"



View the results :



The Plus : AtoZ Provides access to all of the library's resources, including e-journals, titles in full-text databases ; it avoids you looking in each database's publications list : ScienceDirect, Sage, Academic Search Premier, Cairn, etc,
